

[REDACTED]

**HOW WERE PLATO'S IDEAS AND
THE ENERGIc MACROSCOPIC WORLD
BORN OUT OF THE DISINTEGRATION
OF THE WORLD MENTAL SYMBOL**

Plato's Eidoses are not primordial, but secondary. The bricks of the world are not ideal elements remote from their energy in the object and remote from their subjectivity in man, they are Intellectual, Conscious Full-blooded Mentalities that have taken away their Subjectivity from man, and their Energeticalness from the object.

Plato's Eidoses are a mistaken dualistic abstraction, which mirrors only the dualistic human macroscopic world. Plato's Eidoses are secondary formations obtained from the disintegration of World Mentality and the Energetic Cogito of the dualism of the non-energetic thought and the non-thinking energy. Together with the macroscopic world, Plato's Eidoses are born from the act that drives out of the Mentalities the energy which evolves as matter, and disintegrates mentalities themselves into a Semantics distanced from its energy and energy distanced from its Semantics. The disintegration and destruction of World Mentalities is effected as an emission of Temporal Spirit from the Spatial Idea. The Asymmetrical Individualizing tendency, which takes Energy out of the Memory and distances the Remembering Idea from the Unremembering energetic Spirit enhances forgetfulness. That is why we say that Analysis forgets and the Forgetfulness analyzes and makes things asymmetrical. The symmetric desindividualizing and universalizing Tendency that brings Energy within Memory and draws Powers and Particles closer by likening the law-governed regularities of facts, enhances remembering. That is why we maintain that Synthesis remembers and Memory synthesizes, makes symmetrical and generates Universalities. It is Cognition's task and mission to remember this Undivided state of semantics and Energies in their complete Mentalities and to bring back the Unremembering Temporal energetic Spirit within the world space non-energetic Memory of the Ideas a Primordial Total Mentality. But if Plato's Eidoses are not artifacts, but just reflect the moment of Division of World Elementary Mentalities into a thinking space and energetic time, then Plato's Eidoses reflect the state of un-truth which the universe has fallen into, by bifurcating into non-energetic ideas and unremembering energy. Then the state of Truth demands a cancellation of the false state of division and restoration of the Non-ambiguous state of Ideating Energy and Energizing Memory.
