

The Future of Mankind

Look at them: they are talking about the End of the man! In their narcissistic madness they went so far that, in the very beginning of the civilization, they dared to prophesy its end!

Human civilization has been in existence only for 5,000 years and it will still continue to develop after the death of the discernible universe- 20 billion years from now!

The Mind of the universe and the Consciousness are beginningless and timeless. And they will continue to exist for another 20 to the power of 80 billion years! It took only 2,000 years to subjective thinking and rational thinking to develop, and the science has been in existence for only 500 years- through which the mankind took a huge leap forward! So for the mankind there are another 20 billion years of materialistic development to come, and 20 multiplied 80 times by itself hexadecimal years of psychical evolution and development!

Human civilization is still in its beginning, it is only a very young child that is just learning to walk!

Only for the last 1 million years the human Brain has marked a tremendous increase of its mass - twice as much as it was 2 million years ago!

And the pace of its evolution marks exponential increase! Every 10 years the human brain increases its functional potential, and in the last century it started to increase the number of its neurons and its morphological volume every 20 years! Over the last five centuries, the brain started increasing its mass and the number of the neurons every 50 years but throughout the 20th century the brain experienced exponential growth!

Now the number of the neurons increases every 10 years and by the end of the 21st century – in 2100, the two hemispheres will increase by one-third, and by the end of the 22nd – in 2300-the two hemispheres will double their size!

In respect of their morphological and functional Synthesis and integrator- Corpus Callus, increasing its size three times - it will evidently start to differentiate into a third cerebral hemisphere - in 23rd the , which will increasingly impede the inertia of the evolution, and will radically change the constellation of : Skull – Brain - Psyche!

In response to the Mutations in the Psyche some correspondent mutations of the Brain will appear, and consequently - of the cranium...

The Brain as the Skull, which automatically follows the Brain, will modify significantly their Form and structure.

The development of these new morphological modifications will entail a new configuration of the human skull, and consequently - of the human body.

Not later than 2030 women will have extremely difficult labor because of the increase of the diameter of the brain and the skull of the fetus, and also because of the disproportion between the latter and the diameter of the birth canal. The

diameter of the female pelvis will not be increasing in size so fast, and in 2050 the normal delivery through the birth canal will become practically impossible. Then all the women in labor will have Cesarean Deliveries-“Sectio Cesarei”. Yet, this is little or nothing in comparison to the surprises in the Evolutionary processes that we are going to face!

Since the Brain mass will be increasing exponentially faster than the size of the skull, that will lead to an unprecedented tragic evolutionary conflict between the rapid hypertrophy of the Brain and the slow hypertrophy of the skull!

This conflict will be resolved by the Evolution through the fatal “**Cranial-Brain Dismembering**” and the Brain mass will start releasing from its Cranium limitation. This process will entail the separation of the brain mass from the body mass and structure: There will no longer be a morphological relationship between the Brain and the Body and the relationship between them will be only in regard to their function, and yet it will be not for long...

In the future, every 50 years the brain will evidently increase its mass, but in the 24th century even the brain will become unnecessary for the Evolution, and in the 25th century the brain will disappear because it will transfigure in Black Holes, and thus it will finally transfigure in Quantum-Psychic substance.

As long as the Brain remains an evolutionary unity of a macroscopic body and quantum psyche, which are related through the “Black hole of Consciousness” and the “reverse Black hole of Unconscious”, when one of the component starts to disappear – the body, the brain will self-transfigure in another component-quantum unconscious psyche.

Not later than 23rd century the Brain will become totally emancipated from the body. But yet, the brain itself will become unnecessary for the Evolution and the **Evolution will adapt to the processes of concentrating, condensing and symmetrically shaping - transfiguring of psychic-quantum mass in macroscopic energy, and even without the help of Brain correlative!**

Let’s just remind that the main function of the brain was to concentrate, condense and symmetrically shape - in order to reach mutual transfiguration of two different substances: Body substance and Psychic substance.

The evolutionary mission of the brain was to transfigure body-energy substance in psychic-information substance, and vice versa.

The Evolution develops the Brain as Evolutionary **Ontological-transfiguration machine - Lens** to enable the reciprocal equivalent-Symmetry and the reciprocal transformation of the Macrocosmic Energy of the Perception Function of Present in Microcosmic Information of the Wave Function of Quantum Future.

This reciprocal flow and transformation of the Energy into Information and of Soma into Psyche is manifested by the mediation of Quantum Realm.

Once, the Evolution becomes able more easily and quickly to condense, symmetrically shape and transform the psychic-possible-quantum substance in energy-actual macrocosmic energy - only through the Psychic Functions of the

“Chance-Fantasy” and the Consciousness (Consciousness acting as a Black Hole and Chance Fantasy acting as a Reverse Black Hole) - then the brain will be gradually pushed aside from its dominant position of Mediator between the Psychic and the matter, since the new type **“Psychic Concentration-condensation-symmetry and Transfiguration”** will prove more adaptable and fit for the Evolution, when the “Quantum Channels between the “Subjectivity Psyche” of the man and the “Objectivity Psyche” of the universe make the two types of Psyche symmetrical and egalitarian.

This process of emancipation of the Psyche from the Brain and the body will continue to develop through the dominance of the Objective Psychic Functions over the traditional subjective functions.

This in turn will lead to the fusion of the Subjectivities without losing their individualities because of the principle of the Ontological Transparency, which acts in the psychic and quantum world.

And, the Psyche in the form of liberated Psychic Functions and abilities will become independent of the brain and will develop mostly into the Noosphere and the Noo-taxis.

Yet bigger surprises are coming in regard to the evolution of the Psyche, which will continue to increase even more exponentially than the brain.

This fact builds up the following disproportional Picture: The growth of the brain will lag behind the Psyche and the growth of the Skull will lag behind the growth of the brain!

The correlation Skull – Brain - Psyche will radically change through a dual Emancipation:

- 1/ Psychic emancipation of the Psyche from its brain carrier and
- 2/ the Brain emancipation of the brain from its skull prison

Once the brain mass starts liberating itself from the limitation of the skull, and it starts to develop outside the brain, then it will mark the first pre-modification and dislocation of the human body.

When the Psyche becomes totally emancipated from the Brain-mediator, then it will mark the second pre-modification of the human body, and during this process the human body will start gradually to reduce its size until it finally turns into rudimentary organ, similar to the today’s appendix. The Evolution after 26th century will reach extremely speedy and exponential ultra-psychic dimension.

Not later than three centuries from now – in 25th century even the human body itself will become unnecessary and will be a burden on the evolution because the Psyche will totally emancipate from the brain. Then the psychic functions, which will no longer need the brain, will communicate and exchange virtual and psychic energy straightaway and directly with the Objective Unconscious Psyche of the Universe - when the Subjective Psyche of the man of the past will emerge with the Objective Psyche of the Universe.

Then the Evolution will renounce the human body, and later it will also renounce the Brain as a temporary mediator between the Psyche and the Body, because the Subjective Psyche of the man and the Objective Psyche of the universe will find out a way how to merge directly through “Quantum Micro-Singular Anastomoses”.

Depending to what degree in different parts of the Universe the Subjective Psyche will agglomerate and merge with the Subjective Physics through Local Singularities and local singular explosions, resembling implosions of Black Holes - the initial and the primordial “Objective Psyche” will be restored due to that process of re-integration– as far as in the 33rd century the whole universe will be concentrated namely in two manifestations: Objective Psyche, i.e. the information-possible one; and Subjective Physics, i.e. the energetic-actual one. At that stage an observer outside the Earth –perhaps an extra-universal observer– will register just one split dual Universe, which in some of its parts will remain the traditional Universe of galaxies -super new and evolving by inertia stars, and in some other parts - the Universe will no longer be visible, sensory and registered since it will be manifested only by the possible-information-psyche substance.

Only then will the fundamental role of the Quantum Realm become evident - which will turn to be the main channel and mediator, enabling the merge and the inter-transformation between the traditional Energy Universe, having space and Time; and the Information – Possible-Ideal-Psyche Universe, that has no space, time and locality; and by being nowhere it in fact will be everywhere due to its guiding principle of “Ontological Transparency” and “Non-locality”.

A conflict will not arise between the two manifestations since bigger and bigger parts of the Energy Universe of the “Subjective Physics” will find their correlative “Subjective Psychic Correspondents” to merge with, in order to restore and reintegrate the secondarily destroyed “Information-Energy Symmetry” arrangement, which restores the Objective Psyche of the Universe. Thus, let’s remind what the *basic Cosmic Law* states: Initially and timelessly there exists solely the Objective Psyche whose substance is only psychic - information-possible substance. And only by self-disintegration of the “Objective Psyche” whose self-bifurcation leads to two differentiated realms –in the time dimension appear the two modifications: the “Subjective Physics” which is Energy-actuality, and the “Subjective Psyche” which is Objective Psyche.

As a result from the separation and the splitting up of the Objective Psyche into “Information-possible Universe “and “Energy-actual Universe” arises the Space – as a measure of their parting, and on the other hand - the Time - as dynamics of their travel of Parting: where the Time literally becomes a measure of the traveling of Energy towards Information, as well as of the traveling of Information towards Energy.

Since the Space and time are only a measure of the Parting and the separation of the Information Subjective Psyche from the Energy Subjective Physics, then apparently when the “Subjective Physics” and the “Subjective Psyche” enter again into more-intimate interaction and Fusion until they join completely, at that point the time and the Space disappear in the process of Symmetry and egalitarianism of the Energy and Information.

Then as long as the Space and the Time increase they remain a measure and indication of disintegration and parting of the “Energy-Information Continuum”, which is intrinsic substance of the “Objective Psyche”.

In order the initial state of the “Objective Psyche” to be restored it is necessary the “Subjective Physics of Energy” and the “Subjective Psyche of the Information” once again to enter into combination and undergo Fusion.
